Health and Safety Policy

Table of Contents

1. Policy Statement

1.1 The Health and Safety at Work Act 1974 places a primary duty on all employers to ensure, as far as is reasonable, the health, safety and welfare of all their employees. In addition, employers are required to adopt a statement of safety policy.

1.2 University Centre Quayside (UCQ) will seek to establish a culture of mutual safety in which employees are encouraged to "think safety" and to adopt a positive attitude towards the best safe working practice. Our policy is to provide and maintain safe and healthy working conditions, equipment and systems of work for all our employees, and to provide such information, training and supervision as they need for this purpose. We also accept our responsibility for the health and safety of other people who may be affected by our activities. We regard this as a mutual responsibility as employees have a personal responsibility for their own health and safety and for the health and safety of those who may be affected by their activities. UCQ also commits itself to the following health and safety provisions:

- adequate control of the health and safety risks arising from our work activities
- consultation with our employees on matters affecting their health and safety
- the safe handling and use of substances
- ensuring all employees are competent to do their tasks, and to give them adequate training;
- the prevention of accidents and cases of work-related ill health.

1.3 The allocation of duties for safety matters and the particular arrangements, which we will make to implement the policy, are set out below. The policy will be kept up to date, particularly as the business changes in nature and size. To ensure this, the policy and the way in which it operates will be reviewed every year. It will be brought to the notice of all employees and, at induction, to all new employees.

Signed: _____ Date: 17/02/2020 _____

Position: Principal & CEO

2. Additional information

2.1 Appendices

2.1.1 This policy should be read in conjunction with the following appendices:

Appendix A – Risk Assessments and Safety Inspections
Appendix B – Display Screen Equipment
Appendix C – COSHH
Appendix D – Terrorist Threat Policy
Appendix E – Fire and Emergency Evacuations
Appendix F – Accidents and First Aid
Appendix G – Working Alone Information Sheet
Appendix H – General Risk Assessment

2.2 Health and safety key contacts

Name	Designation	Location	Telephone	Email
Sean Robson	Health and Safety Strategic Lead	Quayside i4, Room 121	0191 275 5015/ 07867 503424	sean.robson@ucq.ac.uk

3. Roles and responsibilities

3.1 Health and Safety Strategic Lead – Sean Robson

The Health and Safety Strategic Lead has the following responsibilities:

3.1.1 Will remain responsible for the implementation and operation of the basic requirements of the Health and Safety at Work Etc., Act 1974 and any other safety legislation and codes of practice relevant to the work of UCQ.

3.1.2   Will take a direct interest in UCQ's Health and Safety Policy and fully support all persons who help carry it out.

3.1.3   Ensure that all levels of staff receive adequate and appropriate training / instruction.

3.1.4   Liaise with the Health and Safety Officer on all matters appertaining to Health and Safety

3.2   Health and Safety Officer – Sean Robson

The Health and Safety Officer has the following responsibilities:

3.2.1   Will ensure that there is an effective policy for health and safety within UCQ and also be familiar with the basic requirements of the Health and Safety at Work Etc., Act, 1974 and any new safety legislation which affects UCQ.

3.2.2   Will keep the Strategic Lead and Principal and CEO informed of any changes in legislation which may affect UCQ.

3.2.3   Will periodically appraise the effectiveness of the policy and ensure that any necessary changes are made. Where, in addition, a departmental policy exists, periodically appraise its effectiveness and ensure that any necessary changes are made.

3.2.4   Will ensure that all risks are evaluated within UCQ relating to accidents at work, undertaking systematic and periodical inspection/safety checks of the relevant places of work, evaluating risks at work and where necessary institute working procedures so that each job is carried out to the required standards with the minimum risk.

3.2.5   Complete a Health and Safety Review, Risk Assessment and Safety Inspection (Appendix A) every 12 months

3.2.6   Arrange systems to enable identification of potential hazards, ensuring that any defects in premises and equipment are brought to the attention of the appropriate personnel without delay.

3.2.7   Ensure due consideration and recognition of any risks to the public through any of UCQ's activities

3.2.8   Insist that safe working practices are regularly observed and that safety instructions are incorporated into routine work instructions, reprimanding those who consistently fail to consider their own well-being and that of others around them.

3.2.9   Identify the safety training needs of employees and where possible, ensure that safety training is part of on the job training.

3.2.10 Encourage employees to suggest ways and means of eliminating hazards.
Advise and assist all levels of staff on matters of health and safety and the implementation of UCQ safety policies.

3.2.11 Will liaise where necessary with various enforcing bodies including the Health and Safety Executive, local council Environmental Health officers, the Fire and Rescue Service etc.

3.2.12 When necessary carry out full accident investigations in conjunction with the relevant personnel, collating information and forwarding periodical statistics to appropriate personnel.

3.3   All UCQ personnel

3.3.1   All UCQ personnel have responsibility for complying with the health and safety policy within their place of work. Although every member of staff has a duty for the safety of themselves and others, UCQ recognises that whoever is in charge of any employees has the responsibility for the safe working of those employees. Management will consult and liaise with the Health and Safety Officer on all matters relating to Health and Safety. All UCQ staff must:

3.3.2   Use the correct equipment and tools for the job and any protective equipment which may be supplied, avoid improvising which entails unnecessary risks and work only to laid down safety methods.

3.3.3   Report any defects in plant or equipment to the appropriate personnel. Suggest ways of eliminating hazards.

3.3.4   Be aware of the requirements of The Health and Safety at Work Etc., Act 1974.

3.3.5   Take reasonable care for the health and safety of themselves and of other people who may be affected by his/her acts or omissions at work

3.3.6   Have due regard for any duty or requirement imposed on his/her employer or any other person by or under any of the relevant statutory provision and to co-operate with his/her employer so far as is necessary to enable that duty or requirement to be performed or complied with

3.3.7   Must not intentionally or recklessly interfere with, or misuse, anything provided in the interests of health, safety or welfare.

4.   Staff consultation and training

4.1   Consultation

4.1.1   UCQ believes in the value of consulting widely on policy, problems and good practice. Consultation with employees is provided by direct consultation with The Health and Safety Officer. In conjunction with staff, the Strategic Lead will examine the implications of risk assessments, accidents and dangerous occurrences and the necessary remedial action.

4.2   Single Central Record

4.2.1   The records of all staff health and safety training will be kept on the UCQ Single Central Record.

4.3 Health and safety training schedule

Type of training	Target audience	Timeframe	Responsible department
Health and Safety Induction training (including VDU and Fire and Emergency procedures)	All staff	Within 8 weeks of appointment of employment	Health and Safety Officer
Health and Safety Level 3 Award	Strategic Lead and Health and Safety Officer and any other personnel deemed appropriate to do so	Within 4 weeks of appointment of role	Senior Leadership Team
Health and Safety Risk Assessment Module	Strategic Lead and Health and Safety Officer	Within 4 weeks of appointment of role, training completed annually	Senior Leadership Team
Fire Marshal online training	Fire Marshal	Within 4 weeks of appointment of role, training completed every 3 years	Health and Safety Officer
First Aid at Work Level 2 Award	First Aid Officers	Within 4 weeks of appointment of role, refresher training completed annually	Health and Safety Officer
Emergency First Aid	Senior Leadership Team	Within 4 weeks of appointment of role, refresher training completed annually	Strategic Lead

5. Staff guidance and procedures

5.1 Accidents, first aid and work-related ill health

> Relevant legislation –
>
> Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR)
>
> Social Security (Claims and Payments) Regulations 1979 (as amended)
>
> The Health and Safety (First Aid) Regulations 1981

5.1.1 First Aid

5.1.1.1 UCQ have two appointed First Aid Officers who are able to perform emergency first aid when required. First aid kits are located at the following locations:

- Newcastle Quayside i4– Room 121 – Cupboard beneath whiteboard
- Newcastle Quayside i4– Training Room – cupboard beneath whiteboard.
- Newcastle Quayside i2– Training Room – On wall

- Serviced offices – at reception
- Stockton Business Centre - Room 28 – Identified cupboard in kitchen area

5.1.1.2 First aid boxes will be inspected every 6 months by the appointed first aider. First aid packs will also be provided to employees who travel as part of their role. Employees will be required to bring these to Head Office for bi-annual checks to ensure full supply of stock.

5.1.2 Defibrillator (AED)

5.1.2.1 The designated AED to be used at UCQ Newcastle office is located at the Toffee factory reception (NE1 2DF), adjacent to Quayside i4. This AED has the reference NEAS002874/A and is available between 08:30 and 17:30. A 24 hour AED (reference NEAS003042/G) is located at the North of England P&I Association, NE1 3DU. In all instances, access to these AED's is via a keycode to be given by the emergency services after dialing '999', by a trained and registered first aider, as shown in section 5.1.1.

5.1.3 Accident Book

5.1.3.1 All accidents and cases of work-related ill health are to be recorded in the accident book. The accident book is located in Newcastle Quayside i4, Room 121, beneath the white board and at the Stockton Office in Room 28, in the cupboard in the kitchen area.

5.1.3.2 The Health and Safety Officer is responsible for reporting accidents, diseases and dangerous occurrences under the RIDDOR Regulations to the enforcing authority.

5.1.4 Accident Investigation

5.1.4.1 In the event of an accident/incident being recorded in the accident book, the Health & Safety Officer should carry out an accident investigation by completing the Accident/Incident Investigation Report form.

5.1.5 RIDDOR reporting

5.1.5.1 In certain circumstances an accident/incident which is recorded in the Accident Book must be reported to the local enforcing authority or the Health & Safety Executive. These requirements are found in The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations.

5.1.5.2 After an accident/incident is recorded in the Accident Book the Health & Safety Officer will need to establish if the accident/incident is reportable under the RIDDOR regulations and if so, arrange for the RIDDOR report to be made.

5.1.5.3 The most common cause of RIDDOR reports within this industry sector is due to any accident at work which has resulted in the member of staff taking more than seven days off as a direct result of that accident.

5.1.5.4 If the accident is fatal or results in major injuries, then this must be reported by phone in the first instance. The only exception is when an employee is absent from work for more than seven consecutive days. In all instances, a report form (F2508) must be submitted via the RIDDOR website. This form must be submitted within fifteen days of the known condition.

5.1.5.5 Reporting under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR) may alternatively be carried out by contacting the Incident Contact Centre:
Email: riddor@natbrit.com
Internet: http://www.hse.gov.uk/riddor/

5.1.5.6 If an employee of a different organisation, e.g. contractor carrying out work on premises, or a member of the public sustains a personal injury whilst on the host employer's premises, and the injury is classified as being reportable, then a RIDDOR report must be carried out.

5.2 PAT testing and equipment checking

Relevant legislation –   The Electricity at Work Regulations 1989 (EAW Regulations)

5.2.1 All electrical systems will be maintained and tested in accordance with the 'Electricity at Work Regulations 1989'. The Health and Safety Officer is responsible for organising the maintenance and PAT testing of all portable electrical appliances at a frequency dictated by the type and use of the equipment.

5.2.2 Before using an item of portable electrical equipment, a visual inspection check of the condition of cables, plugs, and casing should be undertaken.

5.2.3 Suitably qualified and competent people will carry out testing, either in-house or on a sub-contract basis.

5.2.4 Any electrical appliances, other than those purchased new, that are brought onto site, even for test or other temporary purposes, must be tested prior to use. This shall include privately owned electrical goods, which should not be brought onto UCQ workplaces without prior authorisation.

5.2.5 The table below shows suggested initial inspection intervals for offices and other low-risk environments.

Equipment/environment	User checks	Formal visual inspection	Combined inspection and testing
Battery-operated: (less than 40 volts)	No	No	No
Extra low voltage: (less than 50 volts AC): Telephone equipment, low-voltage desk lights	No	No	No
Desktop computers, VDU screens	No	Yes, 2 - 4 years	No if double insulated, otherwise up to 5 years
Photocopiers, fax machines: Not hand-held. Rarely moved	No	Yes, 2 - 4 years	No if double insulated, otherwise up to 5 years
Double insulated (class II) equipment: not hand-held. Moved occasionally, e.g. fans, table lamps	No	Yes, 2 - 4 years	No
Double insulated (class II) equipment: Hand-held, e.g. some floor cleaners, some kitchen equipment	Yes	Yes, 6 months – 1 year	No

Earthed equipment (class I): Electric kettles, some floor cleaners some kitchen equipment and irons	Yes	Yes, 6 months – 1 year	Yes, 1 – 2 years
Cables (leads and plugs connected to the above) and mains voltage extension leads and battery-charging equipment	Yes	Yes, 6 months – 4 years depending on the type of equipment it is connected to	Yes, 1 – 5 years depending on the type of equipment it is connected to

5.2.6   Newcastle City Council will be responsible for the regular maintenance and testing of all fixed electrical installations and systems within the Quayside i4 building.

5.3   Fire precautions and emergency procedures

Relevant legislation –   Regulatory Reform (Fire Safety) Order 2005

5.3.1   An overall fire risk assessment for Quayside i4 has been carried out by Newcastle City Council. It is the responsibility of UCQ to carry out a fire risk assessment for their own leased area of the building. With regards to fire exits and emergency procedures the following will apply:

- Escape routes should be checked by The Health and Safety Officer monthly.
- Fire extinguishers are maintained and checked every year by Fire and Safety Ltd.
- Alarms are tested by Newcastle City Council's City Works.
- Emergency evacuation procedures will also be regularly tested

5.3.2   On Discovering a Fire

Should you spot a fire, the following action must be taken:
- Activate the fire alarm system at the nearest call point and alert all employees in the immediate area.
- Dial 999 for the emergency services. When the exchange operator answers, ask for FIRE SERVICE and provide your telephone number.
- When connected to the Fire Service state slowly and distinctly:
  "This is UCQ Ltd" and provide your address. State "we have a fire".
- Do not replace the receiver until this information has been correctly acknowledged.
- If trained to do so, tackle the fire.
- Notify senior person present that you have called the Fire Service.

5.3.2   On Hearing the Alarm

- Leave the building when told to do so and do not stop for personal belongings.
- Evacuate the building by the nearest available exit and proceed to the evacuation Assembly Point.
- The Health & Safety Officer will act as the Assembly Controller and take a roll call to establish that all members of staff and visitors have evacuated the building.
- Do not return until advised it is safe to re-enter the building.

5.3.2.1 Fire procedures are displayed throughout the site for your information.

5.3.2.2 The Quayside i4 fire safety floorplan and additional information is provided in Appendix E.

5.4 Terrorist threats (including bomb threats)

5.4.1 The safety of UCQ staff and students is of paramount importance to the organisation. Actual or threatened attacks by bombs, incendiary, biological or chemical devises pose a risk to all institutions open to the public. Attacks or threats may also be made by persons with a real or imagined grievance against UCQ or those who for various reasons wish to simply disrupt normal activities. The incidence of terrorist attack on non-political and non-military targets in the United Kingdom is relatively low, although the threat level can change quickly depending on national and international events. Lone threats by disaffected or disturbed individuals remain a constant and unpredictable possibility.

5.4.2 UCQ have developed a Terrorist Threat Policy (Appendix D) to assist staff and students on what to do in case this occurs at UCQ.

5.5 General housekeeping

5.5.1 Good housekeeping will reduce accidents, assist in controlling the spread of fire and maintain a professional, efficient working environment. It is the responsibility of all employees and relies entirely on the active involvement of everyone to keep their own work areas tidy, both on company premises and on customer sites.

5.5.2 The following specific points must be adhered to and all housekeeping problems presenting a hazard must be immediately corrected:

- All entrances, exits, stairs, gangways and passageways, particularly escape routes and fire exits, must be maintained free of obstruction.
- Areas immediately surrounding (including underneath) equipment should be clean and free of waste and rubbish.
- All floor and stair tread surfaces should be maintained in good condition and kept clear.
- All spillages and breakages must be cleaned up immediately. Broken glass or other sharp items must not be placed in plastic waste bags but rather disposed of safely.
- Do not interfere with, or obstruct fire-fighting equipment, electrical distribution boards, emergency cut-off switches or circuit breakers.
- Flammable waste, such as paper and cardboard should be placed in specifically supplied containers, which will be emptied at the end of the day.
- All stacked items must be kept in safe order.

5.6   Manual handling

Relevant legislation –   The Manual Handling Operations Regulations 1992

5.6.1   UCQ recognises the risk to employees from work activities associated with the manual handling of persons and loads. In compliance with legislation UCQ will, so far as is reasonably practicable, avoid the need for its employees to undertake any manual handling task which involves the risk of injury.

5.6.2   Where this is not reasonably practicable, UCQ will undertake a risk assessment and take appropriate steps to reduce the risk of injury to the lowest level reasonably practicable through safe systems of work, the provision of suitable equipment, and all necessary information, instruction, training and supervision.

5.6.3   It is equally the responsibility of all employees to take reasonable care for the health and safety of themselves and others, and to co-operate with UCQ in discharging its statutory duty. Therefore, employees have a responsibility to make full and proper use of any equipment or system of work provided to avoid or reduce the likelihood of a manual handling injury.

5.7   Safe handling and use of hazardous substances

Relevant legislation –
Control of Substances Hazardous to Health (COSHH) Regulations 2002
The Classification, Labelling & Packaging Regulations No. 1272/2008

5.7.1   Using Appendix C, the Health and Safety Officer will be responsible for identifying all substances which need a COSHH assessment and undertaking such COSHH assessments as is are necessary. The Health and Safety Officer will be responsible for ensuring that all actions identified in the assessments are implemented and that all relevant employees are informed about the COSHH assessments. The Health and Safety Officer will check that new substances can be used safely before they are purchased.

5.7.2   Safety Data Sheets

5.7.2.1 Manufacturers of hazardous substances are required by law to provide Safety Data Sheets containing information which will enable employers to work safely with these products. They can be obtained directly from the manufacturer or supplier and can often be downloaded from the manufacturer's website.

5.7.3   The assessment process

5.7.3.1 The employer has to decide whether the exposure levels in the workplace are likely to cause risks to health and safety. The assessment process is based on a number of factors including:

- Who is being exposed?
- What substances are being used?
- How long people are being exposed for?
- What levels they are being exposed to?

5.7.3.2 Control measures must be followed if it is found that the exposure to such substances is not being adequately controlled. The control measures must either eliminate the exposure or reduce it to an acceptable level. These control measures must be properly used and maintained in efficient working order.

5.7.3.2 Health surveillance of employees may be required if the control measures are not sufficient to definitely exclude the risk of ill health occurring. If employees are exposed to carcinogenic substances, the effort placed into assessing and controlling the risks will, for obvious reasons, need to be much greater. Adequate training and instruction must be provided to employees on the risks to their health and how to use the control measures provided.

5.7.3.3 The assessment will have to be monitored to ensure that safe working procedures are being followed and it will have to be reviewed at regular intervals to ensure that it remains valid.

5.8   Safe plant and equipment

Relevant legislation – Provision and Use of Work Equipment Regulations 1998

5.8.1   The Health and Safety Officer will be responsible for identifying all equipment/plant needing maintenance and for ensuring effective maintenance procedures are drawn up. He/she will also be responsible for ensuring that all identified maintenance is implemented. Any problems found with plant/equipment should be reported to the Health and Safety Officer. The Health and Safety Officer will check that new plant and equipment meets health and safety standards before it is purchased.

5.9   Use of Display Screen Equipment

Relevant legislation –   Health & Safety (Display Screen Equipment) Regulations 1992

5.9.1   UCQ complies with the requirements of the Health and Safety (Display Screen Equipment) Regulations 1992. The Health and Safety Officer will identify all staff classed as a 'Display Screen User'. UCQ will provide the following requirements for all 'Display Screen Users':

- Workstation assessments which will identify any requirements in line with the standards specified within the regulations
- Free eye tests at an Optician or Vision Screening as required
- Financial assistance towards the purchase of corrective appliances if required
- Health and Safety Training

5.9.2   All 'Display Screen Equipment Users' will contact the Health and Safety Officer before any eye tests or vision screening is organised.

5.9.3   Further guidance on the use of display screen equipment is located in Appendix B.

5.10   Multi-occupancy workplaces

Relevant legislation –   The Health and Safety at Work etc. Act 1974

5.10.1 As an employer operating within a multi-occupancy workplace, UCQ will co-operate with all other organisations operating within the building to ensure there is full compliance with the respective health and safety obligations. UCQ will inform all other organisations about any risks that our work activities could present to their employees, both on and off-site.

5.11   Lone workers

Relevant legislation –   Management of Health and Safety at Work Regulations 1999 (MHSW)

5.11.1 Lone working exists where a person is on their own, when they cannot be seen or heard by another person, and when they cannot expect a visit from another worker. Working alone therefore applies to any member of staff who may go for a period of time where they do not have direct contact with another member of staff. This may include travelling. However, where a member of staff is working alone with a group of students it is unlikely to be considered a lone worker situation in a broader sense of the term.

5.11.2 Lone workers at UCQ will not be put at more risk than any other employees. Where the Strategic Lead feels it necessary, a risk assessment that covers the threat of violence, manual handling, medical suitability and any other potential risks will be carried out prior to the employee commencing lone working. Lone working employees will also be required to inform UCQ of their location by keeping the electronic diary system up to date at all times. Lone workers must also keep a mobile phone for business purposes on them during all working hours. Business mobile phones will be provided by UCQ.

5.11.3 Further information about the health and safety considerations when working alone is located in Appendix G.

5.12   Employees who travel for work

5.12.1 UCQ employees who utilise their own vehicle for business purposes must keep suitable business car insurance and ensure this insurance remains up to date. UCQ will request a copy of their insurance certificate on an annual basis. UCQ will also check the employees driving license information e.g. vehicles they can drive, penalty points or disqualifications. This will require the driver to provide:

- The last 8 characters of their driving license number
- A check code from the driver (this is generated by the driver via the DVLA website).

5.12.1 As per the training schedule in section 5.1, UCQ will provide Emergency First Aid training to all UCQ tutors and training staff. Tutors and training staff will also be provided with a mobile phone, to be used for business purposes only.

5.12.2 All UCQ employees who travel for business purposes will be provided a travel First Aid Kit. It is the responsibility of the employee to bring this kit into Head Office on a bi-annual basis for restocking.

5.13   New and expectant mothers at work

Relevant legislation –   Management of Health and Safety at Work Regulations 1999 (MHSW)

5.13.1 The Management of Health and Safety at Work Regulations 1999 have application to any staff who are pregnant, breast-feeding or who have given birth within the last six months. UCQ are only required by law to take extra precautions for pregnant or nursing mothers if we are notified of their condition in writing. The Regulations provide for UCQ to request confirmation from a medical practitioner or registered midwife.

5.13.2 The existing risk assessment process is extended to cover new and expectant mothers. These will be recorded on a New and Expectant Mother risk assessment (Appendix A) and female workers informed of any additional risks they might face if they become pregnant or are breast-feeding. New and Expectant Mother risk assessments (Appendix A) will be carried out by the Health and Safety Officer.

5.13.3 Additional risks to pregnant women and nursing mothers will be minimised as far as possible. If this is not reasonably practicable, e.g. usual work involves work in areas with a higher risk of slips, trips or falls, activities which prevent the employee leaving the work area for rest or to use toilet facilities, or any case where the person's GP states that her normal work could affect her health and safety; UCQ will find alternative work (with no loss of terms or conditions) or authorise paid leave if alternative work is not available.

5.13.4 Additional information and guidance regarding new and expectant mothers can be viewed the HSE website (www.hse.gov.uk).

5.14   Risk Assessment

Relevant legislation –   Management of Health and Safety at Work Regulations 1999 (MHSW)

5.14.1 The Management of Health and Safety at Work Regulations 1999 (MHSW) impose the requirement for risk assessments to be carried out on any potentially hazardous activity, which may affect staff or visitors/contractors. The process of risk assessment (Appendix A) involves the identification of the potentially hazardous activity, the nature of the hazard involved and the provision of suitable control measures to minimise any associated risk.

5.14.2 Action required to remove/control risks will be approved by the Health and Safety Officer and they will be responsible for ensuring the action required is implemented. The Health and Safety Officer will check that the implemented actions have removed/reduced the risks. Assessments will be reviewed every year or when the work activity changes, whichever is soonest.

5.14.3 A Health and Safety Review, Risk Assessment and Safety Inspection (Appendix A) will be completed every 12 months by the Health and Safety Officer.

5.14.4 A method to implement the various assessments as required by the legal provisions outlined in various regulations has been devised for:

- general risks
- fire
- manual handling
- display screen equipment

- hazardous substances (COSHH).

5.15   UCQ Monitoring

5.15.1 To check our working conditions, and ensure our safe working practices are being followed, the Health and Safety Strategic Lead will carry out regular health and safety inspections of the working environment and consult with the Health and Safety Officer as required.

5.15.2 The Health and Safety Officer is responsible for investigating accidents and work-related causes of sickness absences. They are also responsible for acting on investigation findings to prevent a recurrence.

6.   Student safety

Relevant legislation –   The Health and Safety at Work etc. Act 1974

6.1   UCQ responsibilities

6.1.1   UCQ recognises and accepts its responsibility to ensure that, as far as reasonably practicable, procedures are in place, which provide those engaged in the organisation of training and/or assessment activities with the necessary information to ensure the safety of all participants. UCQ will take all reasonably practicable steps to meet their responsibilities with particular attention being given to:

- Ensuring that procedures relating to the organisation of training/assessment activities are communicated to all staff. Such procedures will involve Health and Safety vetting of all teaching venues.

- Ensuring that those staff engaged in organising training/assessment are competent to do so.

- Ensuring that arrangements are in place for the medical needs and special educational needs of all students.

6.2   Staff responsibilities

6.2.1   It is essential that all persons play their part in ensuring the health and safety of all those affected by UCQ activities. Staff will therefore take steps to meet their responsibilities with particular attention being given to:

- Ensuring that they familiarise themselves with UCQ procedures relating to the organisation of training/assessment activities.

- Ensuring that students are made aware of their responsibilities in respect of their own health and safety and the safety of others whilst they are taking part in training/assessment activities.

- Where UCQ sub-contracts the management and/or delivery of the training/assessment it will ensure that all responsibilities with respect to student accident/incident reporting and student health, safety and welfare are included in its contract with sub-contractors.

6.3 Accident/incident reporting

> Relevant legislation –
>
> Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR)
>
> Social Security (Claims and Payments) Regulations 1979 (as amended)

6.3.1 UCQ will inform the Education and Skills Funding Agency of injuries and diseases to students within the scope of the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations (RIDDOR) 2013 and fatal road traffic accidents.

6.3.2 All student accident/incidents within the scope of RIDDOR will be investigated. A Student Incident Report (or LIR(A) Disease) form will be completed and sent with a copy of the RIDDOR report form to the Education and Skills Funding Agency.

6.3.3 UCQ will also monitor and act on any other harm to students where it can be reasonably expected to do so and/or where the harm could affect the quality of the learning experience.

6.4 Student health, safety and welfare

6.4.1 UCQ will ensure that health and safety matters are effectively communicated to staff and students. This will be carried out in a manner suited to the nature of the training/assessment. All staff and students will be encouraged to be involved in any processes which may affect their health and safety.

6.4.2 UCQ will promote good practice, and in particular the concept of the 'Safe Student'. It is intended that, through the quality of their learning, the student will gain an understanding of health and safety, the identification and control of risk, and developing a set of safe behaviours.

6.4.3 Where part of the learning takes place in an environment outside the direct control of UCQ, UCQ will make an informed judgement about health and safety suitability prior to learning being delivered within that environment. UCQ will use the Education and Skills Funding Agency's health and safety procurement standards for student health and safety.

6.4.5 UCQ will ensure that the students health and safety understanding, and practical capabilities, are periodically assessed based on an assessment of risk.

6.5 Induction

6.5.1 UCQ will ensure that the student receives an in-company health and safety induction covering the essential points of health and safety. It will also ensure that all students receive effective and timely information, instruction and training, and effective supervision based on an assessment of risk.

6.6 Young and vulnerable students

6.6.1 UCQ adopts recruitment processes that comply with the law and ensures that young and vulnerable students are protected. UCQ will register with the Disclosure and Barring Service in situations where our employees have regular contact with students under 18 or other vulnerable students, and ensure that appropriate checks are made to ensure that employment that involves regular contact with young people under the age of 18 is not

offered to or held by anyone who has been convicted of certain specified offences, or whose name is included on lists of people considered unsuitable for such work held by the Department for Education and the Department of Health and Social Care.
